The publishers will keep this proceedings and all articles contained within it on-line on the Internet (or its possible replacement network in the future) for a period of 25 years from the date of publication, barring exceptional circumstances as described separately. The copyright of the articles belongs to the author(s) on the date of publication stated above. Later transfers of copyright will be specified on the web page for the respective article.

The on-line availability of the proceedings implies a permanent permission for anyone to read the articles on-line, to print out single copies of the articles, and to use them unchanged for any non-commercial research and educational purpose, including making copies for classroom use.

This permission can not be revoked by subsequent transfers of copyright. All other uses of the article are conditional on the consent of the copyright owner.

The publication of the article on the date stated above included also the production of a limited number of copies on paper, which were archived in Swedish university libraries like all other written works published in Sweden.

The publisher has taken technical and administrative measures to assure that the on-line version of the proceedings will be permanently accessible using the URL stated above, unchanged, and permanently equal to the archived printed copies at least until the expiration of the publication period.

For additional information about the Linköping University Electronic Press and its procedures for publication and for assurance of document integrity, please refer to its WWW home page: <http://www.ep.liu.se/> or by conventional mail to the address stated above.

Preface

This volume contains the papers that were accepted for presentation at AADEBUG'97, the Third International Workshop on Automated Debugging, held in Linköping, Sweden, May 26–27, 1997.

The area referred to as automated debugging has seen major developments over the last decade. The goal of the workshop was to bring together researchers from different areas of automated debugging and different programming communities to exchange ideas and advance the state of the art of automated debugging. A total of 20 papers were submitted to the workshop. Of these 11 were accepted for presentation, and 3 as position papers.

The workshop addresses advances in run-time checking, debugging optimized code, program slicing, software testing, knowledge-based debugging, and diagnosis of constraint programs.

On behalf of the Program Committee, I would like to thank all those who submitted papers to AADEBUG'97. Thanks also go to the Program Committee and others who helped in reviewing and evaluating the papers. Also, special thanks to the invited keynote speakers, Vijay K. Garg and Massimo Fabris. Last but not the least, the effort of all those who helped in organizing the workshop in one way or another, in particular Nahid Shahmehri, Henrik Nilsson, and David Byers, are gratefully acknowledged.

Linköping, May 1997

Mariam Kamkar

Program Chair: Mariam Kamkar (Linköping University)

Program Committee:

Michel Bergère	University of Orleans, France
Bernd Bruegge	CMU, USA
Włodzimierz Drabent	Polish Academy of Sciences, Poland
Mireille Ducasse	IRISA/INSA, France
Peter Fritzson	Linköping University, Sweden
Keith Brian Gallagher	Loyola College, USA
Claude Jard	IRISA/CNRS, France
Thomas Johnsson	Chalmers university of Technology, Sweden
Mariam Kamkar	Linköping University, Sweden
Bogdan Korel	Illinois Institute of Technology, USA
Jukka Paakki	University of Jyväskylä, Finland
Boris Magnusson	Lund University
Nahid Shahmehri	Linköping University, Sweden
Mary Lou Soffa	University of Pittsburgh, USA
Elaine Weyuker	AT&T Research Labs, N.J., USA
Roland Wismüller	Technische Universitaet München, Germany

Local Arrangements Co-Chairs:

David Byers
Gunilla Blom-Lingenhult

Table of Contents

Invited Speaker

Observation and Control for Debugging Distributed Computations <i>Vijay K. Garg</i>	1
--	---

Run-Time Checking and Debugging Optimized Code

Backwards-Compatible Bounds Checking for Arrays and Pointers in C Programs <i>Richard W. M. Jones, Paul H. J. Kelly</i>	13
--	----

Debugging Optimised Code Using Function Interpretation <i>Kim Elms</i>	27
---	----

Assertions for Dynamic Shape Analysis of List Data Structures <i>Mikhail Auguston, Miu Har Hon</i>	37
---	----

Program Slicing and Software Testing

Application of Dynamic Slicing in Program Debugging <i>Bogdan Korel, Jurgen Rilling</i>	43
--	----

Slicing, I/O and the Implicit State <i>Yoga Sivagurunathan, Mark Harman, Sebastian Danicic</i>	59
---	----

The Design of a Test Case Definition Language <i>David Byers, Magnus Engström, Mariam Kamkar</i>	69
---	----

Knowledge-Based Debugging

Modeling Intelligent System Execution as State Transition Diagrams to Support Debugging <i>Adele E. Howe, Gabriel Somlo</i>	79
--	----

DDB Trees: A Basis for Deductive Database Explanations <i>Sarah Mallet, Mireille Ducassé</i>	87
---	----

Invited Speaker

Constraint Programs Debugging: Current Activities Inside the DiSCiPl Esprit Program <i>Massimo Fabris</i>	103
--	-----

Diagnosis of Constraint Programs

Declarative Diagnosis of Constraint Programs: An Assertion-Based Approach <i>Johan Boye, Wlodek Drabent, Jan Maluszynski</i>	123
---	-----

Positive and Negative Diagnosis for Constraint Logic Programs in Terms of Proof Skeletons <i>Gérard Ferrand, Alexandre Tessier</i>	141
---	-----

Invited Paper

On the Role of Semantic Approximations on Validation and Diagnosis of Constraint Logic Programs

F. Bueno, P. Deransart, W. Drabent, G. Ferrand, M. Hermenegildo, J. Maluszynski, G. Puebla 155

Position Papers

Walk Backwards to Happiness—Debugging by Time Travel

Simon P. Booth, Simon B. Jones 171

Bisection Debugging

Thomas Gross 185

A Hybrid Approach to Propagation Analysis

David Byers, Mariam Kamkar 193
