# Table of Contents

## Prologue
*Mark Ollila and Anders Ynnerman* iii

## Keynote Presentations
The Light Stage: Photorealistically Integrating Real Actors in Virtual Environments  
*Paul Debevec*  
1

## Other Keynote Presentations
Michael Conelly, Viktor Björk, Peter Zetterberg, Mats Erixon, Marcos Fajardo, and Jani Vaarala  
3

## Research Presentations
Implementation of a Dynamic Image-Based Rendering System  
*Niklas Bakos, Claes Järvman, and Mark Ollila*  
5

Snow Accumulation in Real-Time  
*Håkan Haglund, Mattias Andersson, and Anders Hast*  
11

Animation of Water Droplet Flow in Structured Surfaces  
*Malin Jonsson and Anders Hast*  
17

Distributed Rendering in Heterogeneous Display Environments – A Functional Framework Design and Performance  
*S. Seipel, and L. Ahrenberg*  
23

Real-Time Image-Based Lightning in Software Using HDR Panoramas  
*Jonas Unger, Magnus Wrenninge, Filip Wänström, and Mark Ollila*  
29

Towards a Perceptual Method of Blending for Image-Based Models  
*Gordon Watson, Patrick O’Brien, and Mark Wright*  
35

## Work in Progress
Framework for Real-Time Simulations  
*Anders Backman*  
41

Surface Construction with Near Last Square Acceleration based on Vertex Normals on Triangular Meshes  
*Tony Barrera, Anders Hast, and Ewert Bengtsson*  
43

Time Machine Olulu – Multichannel Augmented Reality  
*Jaakko Peltonen*  
49
