Table of Contents

Preface iv
SIGRAD 2007 v

Keynotes

Visual Computing for Medicine 1
Dirk Bartz

How to (and not to) Fool Your Brain to Perceive 3D 2
Stefan Seipel

Research Papers

Using a GPU-based Framework for Interactive Tone Mapping of Medical Volume Data 3
Matthias Raspe and Stefan Müller

Real-time Generation of Plausible Surface Waves 11
Kristian Yrjölä and Thomas Larsson

Clustering Geometric Data Streams 17
Jiri Skala and Ivana Kolingerova

Improving Introductory Programming Courses by Using a Simple Accelerated Graphics Library 24
Thomas Larsson and Daniel Flemström

Work in Progress Papers

Visualisation of Human Characteristics in Vehicle and Health Care Product Development 31
Mikael Blomé, Maria Jönsson, Lars Hanson, Daniel Lundström, Dan Högberg and Dan Lämkull

Some Remarks about Geometry in Medicine 35
Krzysztof T. Tytkowski

Fragments from the Swedish History of Computer Graphics with SIGRAD 39
Lars Kjelldahl

Graphical Literacy Development Using Learning Management System 42
Zoja Veide and Veronika Strozheva

Realistic Virtual Characters in Treatments for Social Disorders an Extensive Agent Architecture 46
Anja Johansson and Pierangelo Dell´Acqua
