The HEAD Graduate School – fostering links with the clinic

One of the aims of the HEAD Graduate School is to foster links between research and clinic. In May 2009, the HEAD Graduate School organised an oral session at Tema Hörsel, Jönköping, Sweden, a national conference for professionals in the field of hearing care. In collaboration with Linnaeus Centre HEAD, the Graduate School also had an exhibition stand at the conference, providing information about HEAD research.

Doctoral student Elaine Hoi-Ning Ng representing HEAD at Tema Hörsel, Jönköping, May 2009.
