

# Preface

Welcome to SIGRAD 2010, the annual conference of SIGRAD, the Swedish chapter of Eurographics. We yet again present an interesting crop of papers from all areas of computer graphics.

We wish to thank

the authors, without whom there would not be a conference,  
the international programme committee, who provided timely and constructive reviews,  
the keynote speakers, Sheila Hemami and George Ioannidis, and the invited speakers, Björn Thuresson and Thomas Porathe,  
for thought-provoking presentations,  
the participants, whom we hope will have an enjoyable conference,  
Mälardalen University and Mälardalen Real-Time Research Centre for their generous sponsorship.
